ABSTRACT. In order to make names available for use in the *Flora of China*, the following combinations are made: *Panzerina lanata* var. *alaschanica* (L. Kuprianaov) H. W. Li, *Panzerina lanata* var. *albescens* (L. Kuprianova) H. W. Li, *Panzerina lanata* var. *argyracea* (L. Kuprianova) H. W. Li, and *Panzerina lanata* var. *parviflora* (C. Y. Wu & H. W. Li) H. W. Li.

Panzerina was published by Soják (1981) to replace *Panzeria* Moench, a later homonym of *Panzeria* J. F. Gmelin. Two species, *P. canescens* (Bunge) Soják and *P. lanata* (L.) Soják, with four varieties, will be recognized in the *Flora of China*. Although the genus was recently revised by Krestovskaja (1991), she used *Panzeria* rather than *Panzerina*. The needed new combinations in *Panzerina* are made here.
